

How to install Microsoft SQL Server Management Studio

Download and install MagicDisc 2.7.106 (Freeware)

From Maltiris2, copy SW_DVD9_SQL_Svr_Standard_Edtn_2008_R2_English_MLF_X16-29588.ISO to local computer (like Desktop).

Find MagicDisc in the System Tray and right-click to select 'Mount as Virtual CD\DVD' then hover over this option to select E:\ No Media (or you can change Drive Letter if it conflicts with your setup).

Select Mount and point to the ISO file which opens the ISO.

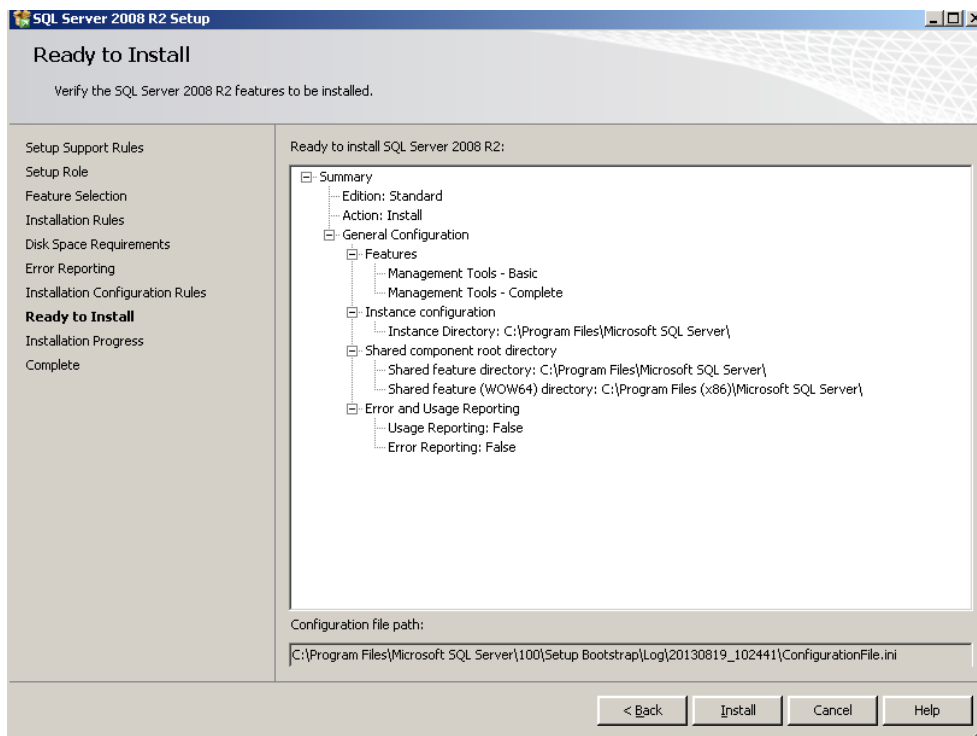

Click on System Configuration Checks inside the ISO and it will perform the necessary checks to make sure it meets the installation pre-requisites. It should have all passes and no errors.

Click Next then select Top Feature called 'Install New Installation or Add Features to An Existing Installation'. Check configuration passes each time.

Product Key is embedded.

Next, dialogue box called Setup Support Files and Select Install. You will get multiple messages and one warning about Windows Firewall. Ignore this and click on Next.

Setup SQL Server Features Installation:

SHARED Features:

- Management Tools – Basic (Management Tools – Complete is automatically checked when you check Mgmt. Tools – Basic)

How to install Microsoft SQL Server Management Studio

A message is displayed when installation of components is successful.

Uninstall MagicDisc and delete local ISO file.
